ELIET, that's how I am

To give your garden some of its individuality, you need a machine with personality. Your personality.

You'll recognise a lot of yourself in your **ELIET** machine: quality, efficiency, an eye for detail and a feeling for precision. As you mature, you become wiser and more experienced. **ELIET** machines evolve and mature too. And as their quality, safety and environment concern grow, the **ELIET** models become even more refined. That makes an **ELIET** machine a reliable total solution, ensuring you enjoy your garden today, and continue to enjoy it well into the future. For the rest of your life.

ELIET MACHINES: BASED ON A RESPECT FOR NATURE

ELIET promotes the fledgling philosophy of recyclable gardening. An ecological vision that ELIET subscribes to in full, based on its passion for nature and admiration for the mystery behind the cycle of life. When you use an ELIET machine you build a partnership with nature.

HARMONY

Cherish your garden and you will get so much back in return. The beauty of a garden is often measured in terms of the pleasure it gives you to get the best out of every last corner. Magnificent flowerbeds intersected by beautifully trimmed hedges. And not a weed in sight. A healthy lawn with perfectly straight edges. An attractive tree with stylishly pruned foliage. The compost heap where all the organic material in your garden is recycled. These are things that every gardener wants to create. And now every gardener can...

ELIET machines help you bring out the best of that natural beauty.

SUSTAINABLE

Nature is our greatest gift to future generations. So we have to handle it with love. ELIET machines help you safeguard the future of natural beauty.

CHIPPING

REFINED AND REFINING

Expert trimming keeps the plants, shrubs and trees in your garden healthy and strong. The garden waste it produces is also a valuable source of energy for new life in your garden. The decomposition cycle is highly dependent on the way garden waste is cut. ELIET has a line of powerful shredders that produce chips with added value for the cycle of nature.

Jean Pain Committee

ELIET supports the ideas of Jean Pain, a French pioneer in composting who gave his name to the Jean Pain Committee, a professional organisation of expert composters. He discovered that the humus of fine wood chips made the dry ground of the Provence fertile. This makes him the ground-breaker in compost-based organic gardening. You can now use ELIET shredders to introduce this principle in your own garden.

Let the Wood Do the Work

The ELIET chippers are equipped with the patented ELIET Chopping principle™.

This chipper technology exploits the weakness of wood by cutting with the grain. That produces Biotech™ chips, which can be converted into nourishing compost very quickly. That's how ELIET machines help you promote the cycle of nature in a user-friendly way. They can handle just about any organic material and even foreign objects are not a problem.

CHOPPING principle™

ELIET Chopping Principle™

The blades of the ELIET shredders cut into the garden waste like miniature hatchets. As a result the wood is cut with the grain. A passel of blades repeat the cycle a thousand of times a minute. The process results in uniform chips that are perfect as a mulch layer or on your compost heap.

Bio-TECH Chips
ELIET NV

Biotech™ chips

The Chopping principle™ squashes and unravels the chips intensely. As a result the grain structure of these ELIET Biotech™ chips is well suited to decomposition. Once chipping is complete you'll have a good, airy mixture with just the right moisture content. That's why Biotech™ chips improve your composting system.

ELIET PRIMO

ELIET PRIMO / MAESTRO

Specifications

ELIET PRIMO

Chops/min	18 000
Capacity (wheelbarrows/hour)	8
Shreddable timberdiameter	35 mm
Chopping Principle™	yes
Power	4 HP
Transmission	Crankshaft mounted
Dimensions (LxWxH)	1450 x 520 x 1340 mm
Storage dimensions (LxWxH)	760 x 520 x 550 mm
Collecting Bag Capacity	60 L
Weight	32 kg
Number of knives	6 RESIST™ steel
Engine	Combustion/Electric 220 V

OPTIONS: Multi-purpose grating
Output deflector

Weight	50 kg
Number of knives	12 RESIST™ steel
Engine	Combustion/Driving Power 3 x 380 V

OPTIONS: Multi-purpose grating
Output deflector
Bag support
Hour meter

ELIET MAESTRO

① **Robust construction:** ELIET machines are all steel constructions, protected by a layer of epoxy paint, guaranteeing years of pleasure.

② **Loading hopper:** a wide hopper maximises comfort when it comes to feeding in branches with twigs, leaves and kitchen waste.

③ **The collection bag:** there will be no waste round your machine or on your lawn, because the chips are collected in a practical portable collection bag.

ELIET

The ergonomics of the **MINOR** and **MAJOR** will knock you out. They harmoniously combine a wide feed-in opening for fast processing of various types of waste, with compactness and user-friendliness. Even crooked branches with twigs are not a problem. Most importantly, the waste treatment process is exceptionally safe. The machines are equipped with a specially mounted safety net, emergency shutdown, steel safety shield and heavy-duty debris guard. The robust construction is modelled on ELIET's professional shredders.

ELIET MINOR

① **Reversible hard steel blades:** razor-sharp blades chip all kinds of garden waste into high-quality chippings. You can reverse the blades so that they last twice as long.

② **Large pneumatic tyres:** vibrations and noise are reduced by the pneumatic tyres. The large easy-roll bearing wheels make for easy manoeuvrability even on bumpy ground.

③ **Belt drive:** the transmission absorbs the dynamic strength of the crankshaft and increases the drive torque on the knife drum, which runs on separate bearings.

Multi-purpose Sieve:
if you only wish to chip damp products, it is advisable to replace the standard sieve screen with the special sieve for leaves and damp products.

DETHATCHING

FOR A LAWN IN PERFECT HEALTH

Dethatching is an indispensable part of proper lawn maintenance. Certainly nowadays, as mulch mowing continues to gain ground. The advantages of mulch mowing are well known, but it does generate a spongy layer of felt and tatch, which is not good for the lawn. The changing climate is also encouraging moss growth, while droughts lead to a great deal of residual dry grass remaining in the lawn. The healthy grass is constricted and finds it

increasingly difficult to thrive. Dethatching is a preventive treatment that does not use harmful weed killers or chemicals. But it does effectively eradicate all parasites, weeds, felt and dried grass. The grass is given the space, light and air it needs. The perfect recipe for strong growth and a beautiful full lawn. The ELIET dethatchers with Permanently Sharp Blades™ keep your lawn in shape.

ELIET E401

ELIET E501

Overseeding

PERMANENTLY SHARP BLADES™, FOR A RADIANT LAWN

New blade...

After 30 hours...

After 60 hours...

After 90 hours...

Sharp knives are guaranteed for more than 100 working hours

You shouldn't set the blades to cut deep when you're dethatching. On the contrary, the trick is to loosen all the moss, felt and other weeds on the surface and lift it out of the lawn. You can then rake or suck it up. Only then can you be sure that all that unwanted material has been removed from your lawn.

That's the basis of the whole unique Permanently Sharp Blades™ concept. The blades are self-sharpening, so they never lose their gripping force. They may suffer some wear, but they will remain sharp throughout their life. The PSB™ technology guarantees the same raking efficiency from beginning till end. The Eliet warranty of a permanently good result.

BLUNT BLADES ARE HARMFUL TO YOUR LAWN!

If you want to create the best lawn you can, ELIET scarifiers are the only choice. Other dethatching machines with traditional blades are all blunted out after a few hours. If you try to manicure your lawn with these blunt blades you may well end up doing more harm than good. Blunt blades cut wide grooves in your lawn and often push the moss deeper into the ground in the process. Worst-case scenario? Irreversible damage.

Their working width makes these virtually, indestructible machines ideal for small and medium-sized gardens. The **E401** and **E501** are designed for home use, but they are modelled on ELIET's professional dethatching machines. They have a very long life and boast unequalled raking efficiency. The machines are light and manoeuvrable, so they are able to cover every single square centimetre of your lawn. The Eliet Permanently Sharp Blades™ also offer a warranty of years of exceptional performance, so that you can dethatch your lawn in the approved manner.

ELIET E501

ELIET E401 / E501

Specifications

ELIET E401

Dethatching width	400 mm
Fixed blades (number/thickness)	14 / 2,5 mm

Dimensions (L x W x H)	1200 x 740 x 1000 mm
Weight	60 kg
Wheels	Roller bearing
Collecting bag	no
Engine choice	Combustion

① **The collection bag:** avoid wasting time collecting moss with the E401's capacious collection bag.

② **You can easily fold down the E401's handle-bar.** This ensures that it does not take up much space in your garage or in the boot of your car.

③ **Vertical belt tension:** this ingenious system virtually eliminates wear on the belt, significantly extending its operating life.

④ **Robust construction:** a steel chassis welded together by robots, strong wheels with natural rubber treads and bearings with dust shields make this machine indestructible.

Machine equipped with fixed knives

OVERSEEDING

A GREENER LAWN IN NO TIME

Is your lawn looking a little lame? Now you can transform a tired lawn into a vigorous expanse of vital green within three weeks. This rejuvenating cure requires you to overseed your worn-out lawn.

Overseeding is the process of injecting new seed into your lawn. It's been used on golf courses and sports pitches for decades. A clear advantage of overseeding is that the lawn remains resistant to disease and drought. It also maintains the diversity of grass types.

ELIET OVERSEEDER

ELIET developed a machine that does this for you, and it costs next to nothing. This precision overseeder injects fresh grass into your lawn just where it's needed. Without wasting seed. Any signs of the

treatment will disappear within a few days. So you don't need to stop using or mowing your lawn for a period of time. The young grass will give your lawn a vital appearance after just a few weeks.

PROACTIVE LAWN MANAGEMENT

It's advisable to overseed your lawn every year. That will nip moss and weed growth in the bud and keep your lawn in good health. And a healthy lawn requires less maintenance of course. So you'll always earn back your investment.

For more information ask your gardener or contact us at +32 56 77 70 88.

TRIMMING

THE ICING ON THE CAKE

The edge of your lawn is one of those hard to reach locations. The grass is uncontrolled and grows wild beyond the confines of the neatly cut lawn. And of course, this looks ugly. Do you really want to deal with that serrated grass edge with a spade, or do you still have several hundred yards to do with the lawn edging shears? We can

understand your desperation. The ELIET trimmer has been specially designed to efficiently perform each of these specific operations. So you can add the finishing touch to your garden lawn. After all, it deserves to have a beautiful straight edge. And you deserve that feeling of satisfaction you get from a job well done.

The **ELIET EDGE CUTTER** saves you time and money. At locations that cannot be mowed by even the best lawnmower, you can simply deploy the Eliet Edge cutter. A neat trim restores an aesthetic tinge to the edge of your lawn. The edger is a compact, but extremely functional machine that it does its work superbly.

ELIET KS 240 STD

ELIET EDGE CUTTER

Specifications

ELIET KS 240 STD

Blade speed	2550 rpm
Blade	Ø 240 mm / 68NiCrMo ³
Depth adjuster	max 80 mm
Angle adjuster	0° - 25° - 45°
Power	3,5 - 4 - 5 - 6,5 HP
Engine	Combustion
Transmission	V-Belt
Dimensions (L x W x H)	1270 x 460 x 920 mm
Weight	34 kg
Wheels	Ø 200 x 30 / Roller Bearing

OPTIONS:

8 tooth steeldisc
Double Frontwheels

① **Robust construction:** the robust construction hands you perfect control of every movement of the blade. Helping you cut any grass that overlaps the edge.

② **Crescent-shaped guard:** to offer protection for the operator or bystanders, the machine has a crescent-shaped protection guard fitted covering half the blade.

③ **Blade adjustable at an angle:** hence the ability to cut away excess grass without damaging the structure of lawn edges.

④ **Axis:** the aligned axes of blade and front wheel ensure that you can mow the perfect curves of creative lawns with the ELIET cutter.

ELIET

LEAF BLOWING

A FRESH WIND THROUGH YOUR GARDEN

During the autumn, nature prepares for a long winter sleep while the trees cover the earth with a colourful layer. This huge scene is a joy for children, walkers and nature lovers, but is also a nuisance when you have to keep your beautiful lawn or car park free of leaves. Leaves on the lawn keep the soil very moist and acidic, with this being the ideal breeding ground for mosses, fungi and mushrooms. Thus, you must not allow all of the effort

that you have already made towards maintaining a beautiful lawn to be wasted. It is therefore important to regularly clear away leaves. Even though, at first glance, this seems like trying to fill a bottomless pit, when you have efficient machines at your disposal you do not have to despair. The objective for anyone who wants a neat lawn, public order and safety is regularly clearing up the leaves.

The **ELIET BL360** is a compact machine that packs the power of a cyclone. The BL360 is so manoeuvrable and lightweight it gets into the smallest corners. The wide turbine reduces noise, which significantly increases comfort of use. Thanks to the vibration absorbers on the handlebar, it is a pleasure to use the machine. The versatility of the special blower nozzle gives full control of the airflow.

ELIET BL360

① **Directable blower nozzle:** you can quickly switch the blowing direction from the side to the front.

② **Large tyres:** The BL 360 is equipped with large pneumatic tyres. This makes the machine extremely manoeuvrable on any type of ground. You can generally drive this machine on the large tyres as it is designed to be well-balanced.

The fixed wheel at the front only acts as a shock-absorbing wheel.

③ **Aluminium fan:** The blades of the fan impeller have a special shape that minimizes the noise level of the fan. As this impeller is manufactured from light aluminium, this has a beneficial effect on the petrol consumption of the engine.

ELIET BL360

Specifications

ELIET BL 360

Air output	50m ³ /min
Airspeed	200 km/h
Turbine	Ø 360 mm
Impeller	Ø 300 mm/ Alu 6mm

SERVICE & MAINTENANCE

To keep your machine in top condition, regular and careful maintenance is needed. If a part needs replacement, it is highly recommended to choose only the original ELIET parts. Each part is made with care and precision, which is the only way of guaranteeing permanent quality. The knowledge of using a tough and reliable machine makes work more pleasant.

Make sure you visit a certified ELIET dealer for the right service.

YOUR GARDEN MACHINE'S ON-BOARD COMPUTER

Keeping an up-to-date record of how much time you've spent working on each machine is a complex task. The need to remember maintenance schedules doesn't make it any easier. But it's absolutely necessary if you want your machines to perform at their best year after year.

The ELIET maintenance meter is an inexpensive option that allows you to manage machine maintenance with little effort.

This meter is your machine's own on-board computer. Just click the meter onto the engine's spark plug wire. The counter is activated as soon as you start the engine.

It contains a traditional hours meter, a tachometer and a maintenance alarm.

The alarm ensures you will never forget to perform scheduled maintenance. So your machine will always be in peak condition.
