

NEW

Joy Stick operation control on ST 27 T

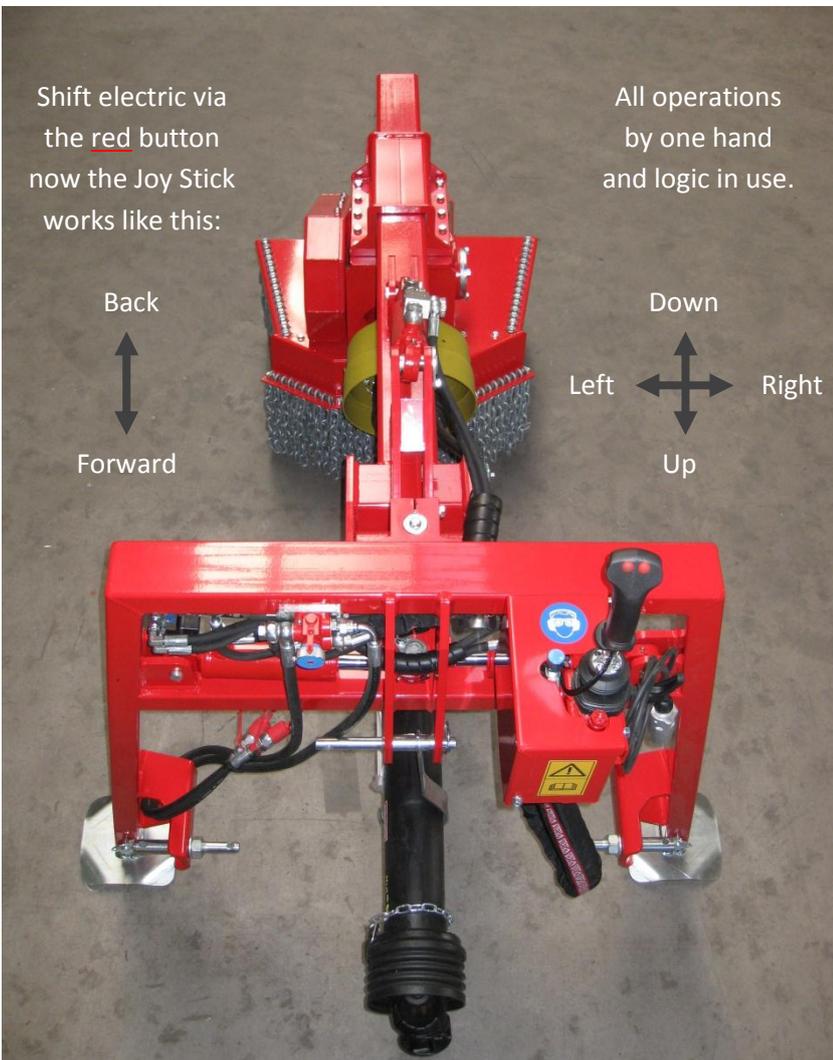

Shift electric via the red button now the Joy Stick works like this:

Back
↕
Forward

All operations by one hand and logic in use.

Down
↕
Left ↔ Right
↕
Up

Easy to move the Joy Stick, just turn ① and pull it of ②.

An extra part like ② follows for easy fitting of the Joy Stick control box near operator.

Speed adjustment of sideways movement's ③ in proportion to situation and experience.
