CHAIN SAW SPARE PARTS

page 52 - 72

PrecisionTooling® is a line of non genuine spare parts suitable to professional chain saws, chain saw accessories and brush-cutter accessories.

The PrecisionTooling® name and trade mark is well known all over the world but in particular is very well established in the tropical areas where the professional chain saws have an heavy and daily use and consequently the demand of spare parts is very high: PrecisionTooling® has made its name as reference for the top quality non genuine spare parts.

Thousands and thousands of cylinders, pistons, crankshafts, air filters, electrical parts etc. are sold every year under the PrecisionTooling® name and in many years of marketing the PrecisionTooling® products have reached the most remotes areas inside the tropical forests of Asia, Africa and South America.

PrecisionTooling® started it's activity as private company in the 80's and in 1998 has become part of Tecomec® S.p.a., adding an important and strategic role in the chain saw spare parts and accessories business.
